

# Jatropha Vikas Sansthan

Selected 2011-13

**Name of the Director:** Mr. Rakesh Gupta

**Established** : 2003

**About Us:** We at Jatropha Vikas Sansthan are one of the leading cultivator/ supplier of Jatropha curcas in the Northern part of India. To fulfill the increasing requirement of bio-diesel, we offer our Jatropha products and related services.

**Product:** Bamboo Sapling, Bamboo Seed, Bio Manure, Jatropha Garden, Jatropha Oil, Jatropha Saplings, Jatropha Seed, Organic Farming, Pongamia Pinnata

**Achievements:** Our establishment in the industry is reflected through our achievements

- In 2003, we started with the tenders of Indian Railways for supplying Jatropha seeds and plantation work on Railway land i.e. on the both sides of Railway Tracks of the concerned Railway Divisions.
- We have successfully completed the plantation of 17,000 Jatropha plants on the both sides of railway track for South Western Railway, Mysore Division.
- In East Coast Railway Khurda Road Division, Behrampur Orissa, had completed Jatropha plantation with quality planting material of 27000 plants.
- We delivered Jatropha plants to Uttaranchal Bio-Fuel Board and supplied sapling of Jatropha, as well as supplied Bamboo sapling to Uttaranchal Bamboo Foundation.

- We manufactured our own fertilizer & supplied to Uttaranchal Bio-Fuel Board.
- We also completed plantation in district Sambha, Vijaypur, Hira Nagar, Kathua, Gangual through BPL Family.
- We also began our operation in the manufacturing of Organic Manure, which is being recommended the best for Jatropha. Hence, Uttaranchal Bio-Fuel Board, Dehradun had placed us an order for 1200 ton Bio-Manure which is available with us in the packing of 50 Kg. Bags
- We have also made various MOU's with the Manipur's Govt. & semi government organization.
- We have completed 23 hect. Jatropha plantation under P4 model of Jatropha mission, Govt of Uttar Pradesh in 2nd week of September as well as 500 Hect. at Jammu & Kashmir.
- We are in process to plant Jatropha at Madurai District, Tamil Nadu at over 1000 acre of land in the month of October.

**Promotion:** We have established nurseries on our own land for raising quality saplings as well as signed various MOU's with different NGO's of different states of India. We are working in connivance with various state government organizations and are undertaking plantation activities on wasteland of state government. We have our own expelling unit under the banner of National Biofuel Corporation at Delhi.

Pongamia Pinnata

Bio Manure

Jatropha Oil

Jatropha Saplings

Bamboo Sapling

Jatropha Garden, Bamboo Saplings, Jatropha Oil, Agriculture Land, Jatropha Seed, Jatropha Saplings, Pongamia Pinnata, Jatropha Plants, Bio Manure, Organic Farming, Contract Farming and Bamboo Seed.

The Jatrophas seeds possess some unique characteristics that are used for the production of biofuels both from an economic as well as an environmental point of view. It grows o poor soils in arid conditions. Jatropha seed are used as an energy crop does not compete with other food crops as it does not need suitable lands with moderate climate.

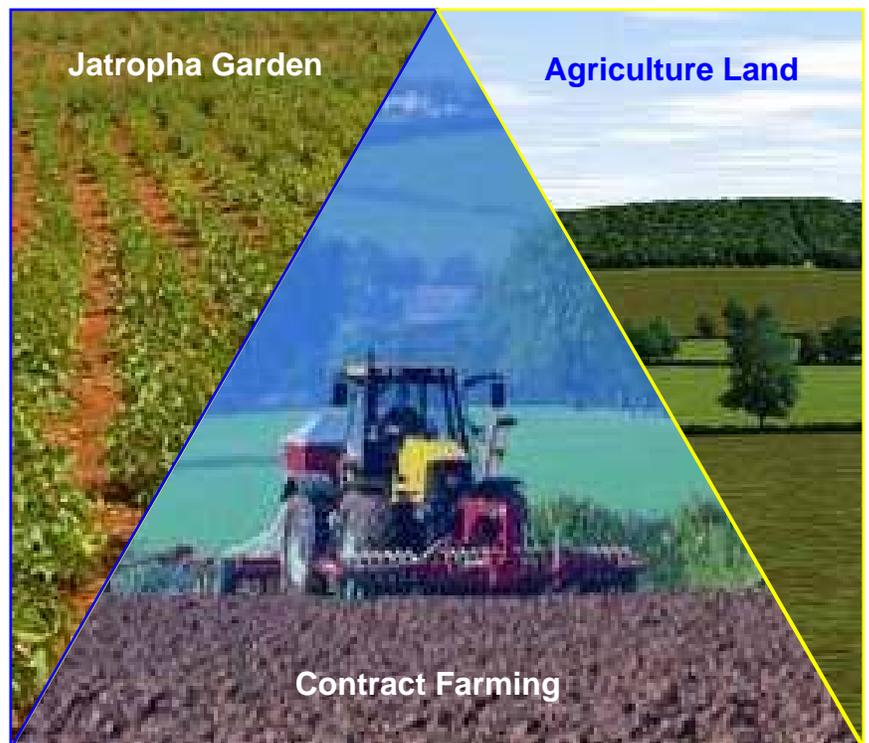

**Mantras to become a Successful Entrepreneur:** Never step back after taking a decision and don't give up until every possibility of success have been explored.

**Social and Ethical Responsibility:** The JVS is committed to contributing to the reduction of global reliance on non-renewable energy sources which are contributing to global warming through the emission of greenhouse gases. The society intends to conduct its agro-forestry in a sustainable manner, with the aim of ensuring that the benefits of producing vegetable oil (for refining into biodiesel) do not come at the cost of destruction of the environment, the misuse of water and other natural resources or the loss of biodiversity.

**The Energy Group:** We are a part of the “The Energy Group” that is formulated for the benefit of economically deprived people to make them self dependent and raise their standard of living. It is a vast group working on the various aspects of production of healthy plantation.

**Our Clientele:** We have catered to our clients in different parts of India. Over the years, we have handled a large number of projects for various government and private organizations. We are supplying seeds to the Government institutions or departments that are: Indian Agricultural Research Institute, Pusa, New Delhi; CH. Charan Singh Univ, Bawal (Haryana); South Eastern Railway, Kharagpur & Ranchi; Uttaranchal Forest Development Corporation, Haridwar; Uttrakhand Bio-fuel Board; Uttrakhand Bamboo Foundation.

**Our Range:** Engaged in cultivation or supplying of Jatropha curcas in the Northern part of India, we have etched a prominent place for ourselves in this industry. Our operations are focused towards setting up a profitable Jatropha plantation producing seeds for oil, which eventually can be converted into bio-diesel. The range that we deal in includes:

Jatropha Garden

Agriculture Land

Contract Farming
