

Rollins Engineering

Name of the Chief Executive: Mr. A. T. Roy
Year of Establishment: December, 1989

Product: Our is a Mechanical Engineering Company mainly serving industries such as petrochemicals, refineries, piping equipments, fabrication plants etc.

History: I am a mechanical Engineer and have served in Bangalore in construction companies as project manager for 12 years before starting on my own with initial contracts from Indian Air Force. In my task of setting up Rollins Engineering I was helped by my wife and friends, colleagues and my own employees. Contracts from Reliance Industries and other petrochemical companies followed. We are also working on contracts from Gulf companies. We grew from strength to strength during the past twenty years due to our excellence in performance, quality as well as our safety standards. Over the years our incident free performance has earned us as many as 3 awards for from Reliance.

Achievements: I have received a Fellowship from Automobile Industry during my early days and am also recipient of 3 awards including the prestigious Rashtriya Udyog Ratna Award.

Marketing: Ours being a highly skilled type of work, and also the need for good machineries, experienced staff as well as sound finance, not much competitions exist. Excellent track record and past work experience being our USP.

Recent Developments: We have now diversified into the field of shipping, too.

Promotion: We are constrained in widening our work due to the acute shortage of highly skilled work force that is required in our type of work as most of the available manpower being absorbed in gulf countries.

regularly updated and we maintain excellent standards in our quality of work to the satisfaction of our customers.

Brand Value: We have maintained 'A' grade in our performance all the time and that is our Brand Value.

Corporate Social Responsibility: I am member of Engineering Expert Council, Sound Engineering Body etc.

Great things about your company: We do specialist jobs as Larsen & Toubro and all our works are highly skilled and our performance is one of the best in our field.

Expansion Plan: As I have mentioned, we have already diversified into the shipping field in gulf countries and we already have contracts in Kuwait.

Recreation Facility: Wherever we have offices, we have staff welfare schemes running and our administration have made arrangements outside office premises on rented properties.

Success: We are an ISO certified company, our employees are kept
