

VIMSON INDIA ENGINEERS

Director : Mr. Bibhishan Malhari Jambhale
Established : 1994

Products: Food process equipments. Aromatic distillation unit

Aromatic Distillation Plant

History: We started with fabrication in mild steel. After a few years we started stainless steel fabrication. Due to this stainless steel fabrication we got the opportunity to fabricate equipments for the food industry. In 2003 Pepsico India gave us the chance to develop vertical blender and we did it. Today we are OEM for blender in Pepsico and DSL Group.

Aromatic Distillation Machinery

CONDENSERS

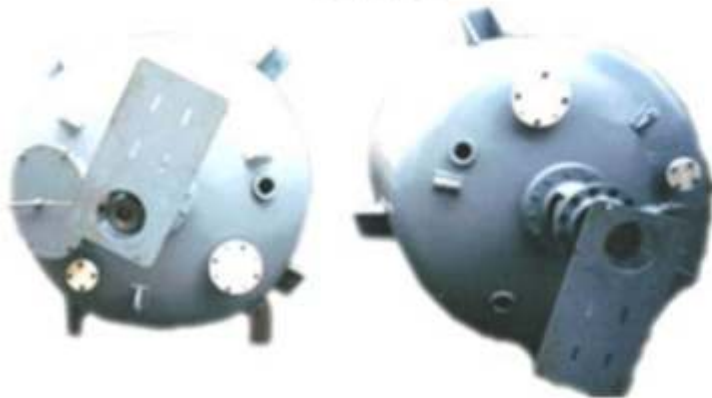

STEAM GENERATORS

Rotavator

Reactors

Achievements: Design and developed various type of blenders for food industry. Developed equipments for aromatic and medical plant extraction.

Market: Food processing, Pharmaceuticals, Cosmetic and Chemical industries.

Recent developments: Design and developed vertical blenders, which occupies less space, consumes minimum electricity and gives maximum output in less time.

Promotion: Our multinational clients promoted us by mouth to mouth publicity.

Expansion Plan: We are planning to expand our business globally.

Facilities for staff: Two times a year we organize family trips. We organize prize distribution for talented students. We also organize Ganapati festival in our company.

Mantras to become a successful entrepreneur: Commitment, politeness, quality, timely delivery and capability are major steps in the path of becoming a successful entrepreneur.

Corporate Social Responsibility: Save electricity, save space, and generation of employment.
